

I am opposed to this because of the following reasons:

1 Cable internet in my area is slow has packet loss and is very costly

2 DSL allows me to choose my ISP and not be forced into MSN or Comcast

3 My company is an ISP this would complicate my ability to work from home

4 This would hurt my company as it is a source of revenue for us.

5 I believe that Qwest would raise the rate for stand alone DSL or discontinue it all together

6 Qwest may also start to require bundled packages to get DSL and that could hurt other companies offering other services such as VOIP.
